About me

I'm 31, and I've always been curious about technology in every form. Even today, I'm interested in pretty much everything that is tech-related. I find it stimulating to learn and challenge myself; I always feel like I need to learn more and understand things better. In my free time, I love to walk with my dog and spend time with my girlfriend. I also like going to the gym; it keeps me energized and reminds me that consistency and discipline are the keys to improvement.

Work Experience

- Software Developer, Yuxme

Full Remote

Oct 2022 - Today
Current

» I am currently engaged in refactoring the entire backend of Yuxme to make it more efficient and adaptable to different clients (prior to this the application was exclusively web-based). In addition to this, I am responsible for overseeing the development of the mobile app and acting as a facilitator between development teams and stakeholders.
» C# .NET 6 | Node.js (Typescript) | SQL Server | Elasticsearch | REST API | Microservices
- Software Developer, Flowing

Full Remote

Sept 2021 - Sept 2022
1y 1 month

» I worked on various projects for different clients. Since Flowing had a flat organisational structure I had the opportunity to enhance my soft skills: it was essential to learn effective communication, negotiate requirements and self organise my own work.
» Node.js (Typescript) | PHP | MySQL | MongoDB | REST API | Microservices | Docker
- Software Developer, PhotoSi

Riccione, Italy (hybrid working)

Feb 2016 - Aug 2021
5y 6 months

» During these years I worked developing, maintaining and refactoring the company's software. It was composed by several monoliths that we refactored with microservices and serverless functions. I've been part of several teams IT (mobile, web, retailer and production department).
» C# .NET | SQL Server | Microservices | Serverless | Docker

Skills

- Technologies

I have extensively used C# (ASP.NET, Entity Framework etc); I also have considerable experience with Node.js (Typescript).
For some time I worked with PHP, Java and Kotlin.
- Software Engineering

Microservices, Serverless, Agile, CI/CD, Unit tests, DDD, Hexagonal architecture
- Languages

Italian (Native), English (Intermediate - B1 PET Certificate)

Education

- Bachelor Degree in Computer Science

» University of Urbino "Carlo Bo", Urbino (PU, Italy)

Oct 2012 - Sept 2016
- Scientific High School Diploma

» Institute "Volterra Elia", Ancona (AN, Italy)

Sept 2006 - July 2011
